REPORT OF AERIAL DETECTION SURVEY

AREA SURVEYED: Conecuh National Forest

STATE: Alabama COUNTY: Covington and Escambia

ACREAGE WITHIN SURVEY BOUNDARY: 171,154 DATE: September 10, 1975

AIRCRAFT: Aero Commander SURVEY CREW: Boddie and Churchill

SURVEY OBJECTIVES: To detect any significant insect activity and, in particular, southern pine beetle. Other bark beetle activity was also noted.

SUMMARY: Very little insect activity was observed on the Conecuh N.F. Occasional scattered single red and fading trees were observed. Only one spot containing five red topped trees was noted. Southern pine beetle, as well as other bark beetle activity, appears minimal. No other significant insect activity was observed. Should District personnel detect any significant southern pine beetle or other insect activity, the Resource Protection Unit should be contacted at the address below.
